

## Moral and Civic Education

Our vision calls for offering our students a whole person education, which means providing them with formation that helps them become men of character and build their lives on a platform of values and virtues. Through development of virtues, students will get hold of a moral direction that guides them through the challenges of life, with courage, justice, clarity of thought and self mastery to take up responsibilities and overcome difficulties. To this end, we have the following programmes.

### Virtues and Civic Education Programme

We respect the traditional culture and extol benevolence (仁), righteousness (義), rites (禮), wisdom (智) and trustworthiness (信) in our Virtues Programme. We name our classes after these virtues, and incorporate them in the school curriculum, co-curricular activities and talks in the assemblies. In addition, we organise programmes to develop students' civic-mindedness and sense of citizenship.

### Tutoring Programme

Each student is provided with a personal tutor, who will help him set his goals, plan his studies, form his character and develop his problem solving skills through regular individual or group tutoring sessions. The personal tutor of a student is often his class tutor. Personal tutors work together with the guidance and counselling teachers and school social worker, if necessary, for helping the students form good behaviour and character.

### Pastoral Programme

Besides our formal curriculum in Religious Studies & Ethics lessons, we organize activities that help students to learn about the Catholic Christian belief and the values that it builds on. Our school chaplain coordinates catechism class, retreat and gives spiritual direction while the Fide Society runs activities that enhance students understanding and practice of the faith, helping them to become Christian Gentlemen.
